Call for Participation

Research proposals can be written in **English** or **Arabic**

The challenges and crises facing the world as a result of the Corona pandemic, and its fundamental effects on all aspects of life; e.g. education and learning at all levels as well as the decisions that were issued such as the social distancing that led to the closure of educational institutions, necessitated the adoption of mechanisms and strategies by employing technological innovations and tools, systems and applications for the continuity of the educational process. It was not an easy task for all participants and leaders of the educational systems due to the *sudden emergence* of Corona pandemic and its *widespread* led to the emergence of many of problems and difficulties. Besides all the political and economic challenges, Palestine is already facing, the new challenge which imposed responsibilities on institutions and individuals to seriously survive the education system. A group of experts and academics exploit their expertise and established education-community based special interest group to contribute to the quality of education in response to the ongoing challenges.

This situation has forced all educational institutions in the globe to use technology in education to survive the academic year and minimize the losses of education opportunity. The pandemic situation and its effect in education show up the necessity of convening an international conference to be the arena of exchanging experiences and sharing knowledge in using new methods and techniques, presenting and sharing relevant research, reviewing and evaluating current status as well as proposed development mechanisms, upgrading educational systems and benefit from the exchange of experiences and practices at local and international levels, cooperating and coordinating between the education institutions and optimal usage of resources, in order to reach the best results, through best practices.

Accordingly, we are pleased to announce the organization of The International Virtual Conference on Digital Learning and Teaching During Crisis as a special issue of the 6th session of TICET2021, the International Conference on ICT in Education & Training. We cordially invite you to submit the results of your studies and researches to present in this Conference. We hope you participate actively and invite your colleagues to participate in its activities. For more information, please visit the conference website:

Objectives

- Promotes research on the effects and changes resulting from the emergence of the Corona pandemic in the educational field.
- Explores benefit from the trends of Arab and global experiences as well as educational applications in light of a crisis.
- Presents future scenarios for integrating eLearning and distance education in formal education.
- Offers effective insights and approaches in education development processes based on the pros and cons of experiences.
- Exchanges local, regional, and international experiences in the educational fields in light of crises.
- Follow - up developments in education and training techniques, and its future trend.
- Promotes the building and using the open educational resources.
- Exchanges expertise, experiences, and strengthening the bonds of ties between researchers in the Arab world and abroad.
- Promotes digital awareness in teaching and learning in society.

Conference Themes

➤ Educational techniques

- The educational applications
- Learning through the smart phone-mobile
- Virtual reality and simulation
- Networks Educational social
- Interactive multimedia

➤ Quality assurance, standards and evaluation legislations

- Quality Assurance and evaluation in e-learning and e-training
- Educational technology standards and indicators
- Evaluation of educational activities
- Legislation governing digital education and learning

➤ Analytical studies and lessons learned

- Local, regional, and international experiences in distance education
- e-learning for disabilities people
- Educational and learning games
- Analyze the uses and practices of digital education

➤ A teaching and learning in crisis

- The digital transformation in education during crises
- The digital gap under the pandemic of Corona
- Plans for the continuity of education under the pandemic Corona at local, regional and international level
- Implications of education under the Corona pandemic
- The future of education after the pandemic Corona (visions and perceptions)

➤ Integration of technology in education

- e-Learning and teaching educational curricula
- Future trends in digital learning
- Content management systems and learning
- Virtual classroom systems
- Vocational and technical education between reality and expectations

➤ Digital curricula

- Build educational digital contents and digital courses
- Create and use open educational resources
- Digital education and training curricula and methods
- Design digital exams

➤ Digital services in educational institutions

- Educational Information Systems
- Digital libraries
- Virtual universities
- Testing banks and their monitoring systems

Types of Participations

- Posters
- Awards
- Certificates

- Keynote Lectures
- Workshops and lessons
- Research presentations

Deadlines

First Submission	October 30, 2020
Acceptance / Rejection	November 30, 2020
Camera ready	December 30, 2020
Registration	January 15, 2021
Conference	January 24-25, 2021

Participation and Instructions

- Anyone interested can submit their proposals in the form of research papers, workshops, short tutorials, software applications or posters within the themes of the conference (previously mentioned but are not limited to).
- Conference Participation Fee: 50\$ (to cover the conference brochure, Proceeding, Certificates, and logistics). Please let us know how the organizing committee can assistance you.
- all proposals and researches are presented through the **easychair** site:
<https://easychair.org/conferences/?conf=ivcdltc2021>
- Please see authorship instructions on the conference website:
<http://eesig.org/conf>
- The distinguished scientific proposals chosen from the scientific committees will be submitted to publish in special publications in scientific journals after further review. More details will be provided to you later .
- For any inquiries, please do not hesitate to contact us at the e-mail:
